Tune: “Stop In The Name of Love” by The Supremes

Stop in the name of Earth, dear planet of our birth,  
Think it o-o-ver, think it o-o-ver.  
Global warming is a threat to all the world and all of the human race.  
We’ve got to turn to the wind and sun.  
The days of oil, coal and gas are done.  
We can’t wait any longer, friends.  
Our fuel addiction must end.  
Hear the Earth cry, “haven’t I been good to you?”  
Hear the Earth sigh, “haven’t I been sweet to you?”

Stop in the name of Earth, stop this calamity,  
Stop in the name of love, love for humanity.  
Think it o-o-ver, think it o-o-ver.

Climate change is increasing every day.  
We can’t afford to dither and delay.  
We lost four years with the Trump administration.  
Now we’re in a desperate situation.  
We can’t wish rising seas away.  
The time to act is today.  
Think it over, what’s the alternative?  
Think it over, we’ve got to change how we live.

Stop in the name of life, stop this calamity.  
Stop in the name of Earth, there is no Planet B.  
Think it o-o-ver, think it o-o-ver.

We’re out of time, time to be patient.  
With our fossil fuel infatuation,  
And if we don’t get our act together,  
The world we live in may be gone forever.

Stop in the name of love, love for humanity,  
Stop in the name of life, stop this calamity,  
Stop in the name of love, love for humanity,  
Stop in the name of Earth, there is no Planet B.  
Stop in the name of Earth, dear planet of our birth,  
Think it o-o-ver, think it o-o-ver.
